Outdoor Fibre Optic Cable (2-8 F)	10
Tactical Cable	11
Hybrid Cable	12
General Instructions	13

OUTDOOR CABLES (2-12F)

Applications

Inside Duct, Pulled or Blown For CATV application, aerial application along with messenger wire.

Cable Construction

Up to 12 low water peak single mode fibres in compliance with ITU-T-G.652D

Metallic / Non metallic rod used as strength member embedded in sheath

Loose buffer tubes jelly filled and centrally placed in the cable UV stabilized PE outer sheath, black.

Mechanical Characteristics

Temperature Range (IEC 60794-1-2-F1)
Laying & Installation -10°C to +50°C
Operation -20°C to +60°C

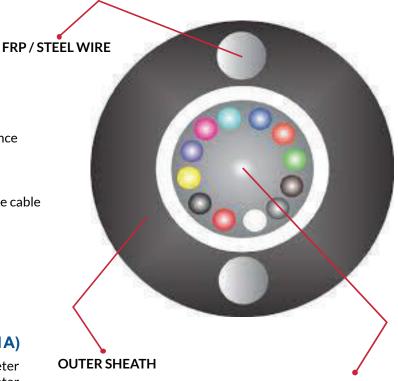

Cable Bending Radius (IEC 60794-1-2-E11A)

During Installation 20D, D=Cable Diameter

Installed 15D, D=Cable Diameter

Repeated Bending 30 Cycle, r=20D, 5 Kg,Load, D=Cable Diameter

(IEC 60794-1-2-E6)

LOOSE TUBE WITH JELLY & FIBRE

Tensile Force (IEC 60794-1-2-E1)

During Installation 800 N Installed 500 N

Torsion Resistance (IEC 60794-1-2-E7) 10 Cycle (\pm 360°) 5 Kg weight, L=1 Mtr Crush Resistance (IEC 60794-1-2-E3) 500 N (100 X 100 mm) for 60 sec

Kink Resistance (IEC 60794-1-2-E10) 15D, D=Cable Diameter

Water Penetration (IEC 60794-1-2-F5B) 1 Mtr Water Head,3 Mtr Cable Sample, 24 Hours

Variants*

*Cable can be supplied with single mode (ITU-T-G655, and G657) & Multimode (50µm & 62.5µm)

*Outer Jacket can be of PVC, LSZH, and HDPE

*Strength member can be Steel or FRP

Fibre Count	Diameter (mm) (Nominal)	Weight (kg/km)	Tensile Strength Installation	Tensile Strength Installed
2 to 8	6.0	30	800	500
12	6.5	35	800	500

OUTDOOR CABLES (2-144 F)

Applications

Inside Duct, Pulled or Blown

Cable Construction

Up to 144 low water peak single mode fibres in compliance with ITU-T-G.652D

Metallic / Non metallic element used as central strength

Member for Tensile Strength
Loose buffer tubes jelly filled
Loose buffer tubes S-Z Stranded
Cable core filled with jelly
S-Z core wrapped with polyester tape
UV stabilized PE outer sheath, black.

Special Features

Flexible buffer tubes provide easy Lighter weight cable for fast and easy installation

Mechanical Characteristics

Temperature Range (IEC 60794-1-2-F1)

Laying & Installation $-10^{\circ}\text{C to} + 50^{\circ}\text{C}$ Operation $-20^{\circ}\text{C to} + 60^{\circ}\text{C}$

Cable Bending Radius (IEC 60794-1-2-E11A)

During Installation 20D, D=Cable Diameter Installed 15D, D=Cable Diameter Repeated Bending 30 Cycle, r=20D, 5 Kg (IEC 60794-1-2-E6) Load, D=Cable Diameter

Tensile Force (IEC 60794-1-2-E1)

During Installation 1800 N Installed 1000 N

Torsion Resistance (IEC 60794-1-2-E7) 10 Cycle (\pm 360°) 5 Kg,Weight, L=1 Mtr Crush Resistance (IEC 60794-1-2-E3) 1800 N (100 X 100 mm)for 60 sec

Kink Resistance (IEC 60794-1-2-E10) 10D, D=Cable Diameter

Variants*

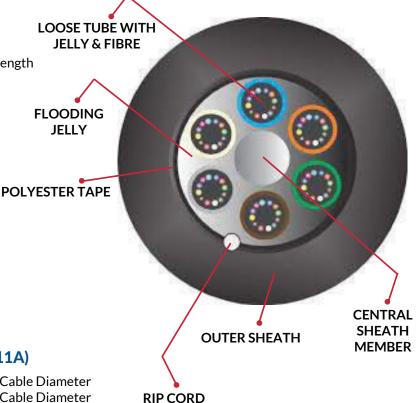

*Cable can be supplied with single mode (ITU-T-G655, and G657) & Multimode (50 μ m & 62.5 μ m)

*Outer Jacket can be of PVC, LSZH, and HDPE

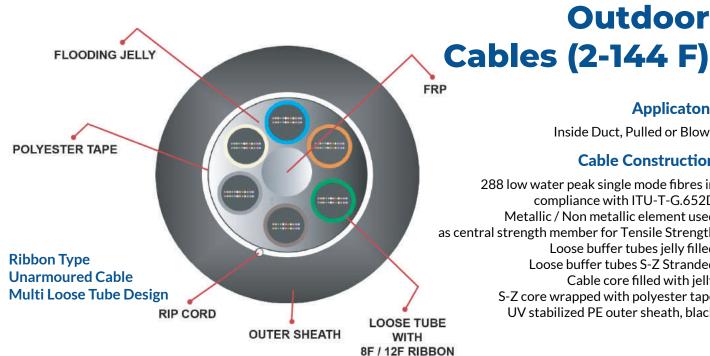

*Strength member can be Steel or FRP

Fibre Count	Diameter (mm) (Nominal)	Weight (kg/km)	Tensile Strength Installation	Tensile Strength Installed
Up to 72	10.0	85	1800	1000
96	12.0	115	1800	1000
144	15.0	180	1800	1000

Multi-tube Single Sheath Unarmoured Cable Multi Loose Tube Design

Applications

Inside Duct, Pulled or Blown

Cable Construction

288 low water peak single mode fibres in compliance with ITU-T-G.652D Metallic / Non metallic element used as central strength member for Tensile Strength Loose buffer tubes jelly filled Loose buffer tubes S-Z Stranded Cable core filled with jelly S-Z core wrapped with polyester tape UV stabilized PE outer sheath, black

Special Features

Flexible buffer tubes provide easy fibre routing inside closure Lighter weight cable for fast and easy installation

Mechanical Characteristics

Temperature Range (IEC 60794-1-2-F1) Laying & Installation -10°C to +50°C Operation -20°C to +60°C

Cable Bending Radius (IEC 60794-1-2-E11A)

During Installation 20D, D=Cable Diameter Installed 15D, D=Cable Diameter **Repeated Bending** 30 Cycle, r=20D, 5 Kg (IEC 60794-1-2-E6) Load, D=Cable Diameter

Tensile Force (IEC 60794-1-2-E1)

During Installation 3000 N Installed 1500 N Torsion Resistance (IEC 60794-1-2-E7) 10 Cycle (± 360°) 5 Kg,weight, L=1 Mtr 1500 N (100 X 100 mm) for 60 sec Crush Resistance (IEC 60794-1-2-E3) Kink Resistance (IEC 60794-1-2-E10) 15D, D=Cable Diameter 1 Mtr Water Head, 3 Mtr Cable Sample, 24 Hours Water Penetration (IEC 60794-1-2-F5B)

Variants*

*Cable can be supplied with single mode (ITU-T-G652, G655, and G657) & Multimode (50µm & 62.5µm)

*Outer Jacket can be of PVC, LSZH, and HDPE *Strength member can be Steel or FRP

Fibre Count	Diameter (mm) (Nominal)	Weight (kg/km)	Tensile Strength Installation	Tensile Strength Installed
96	17.0	250	3000	1500
288	18.5	330	3000	1500

Applications

Inside Duct, Pulled or Blown In areas where high mechanical load is required In areas where rodent attack is there

Special Features

Lighter weight cable for fast and easy installation Robust Construction

Mechanical Characteristics

Temperature Range (IEC 60794-1-2-F1)
Laying & Installation -10°C to +50°C
Operation -20°C to +60°C

Cable Bending Radius (IEC 60794-1-2-E11A)

During Installation Installed Repeated Bending (IEC 60794-1-2-E6) 20D, D=Cable Diameter 15D, D=Cable Diameter 30 Cycle, r=20D, 5 Kg Load, D=Cable Diameter

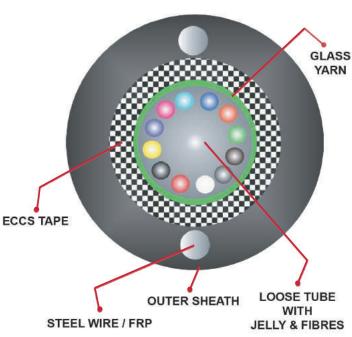

Cable Construction

Up to 12 low water peak single mode fibres in compliance with ITU-T-G.652D $\,$

Metallic / Anti buckling element steel wires are used as Peripheral Strength Member

Loose buffer tube jelly filled and centrally placed in the cable UV stabilized PE outer sheath, black

Uni Tube Unarmoured Cable Design

Tensile Force (IEC 60794-1-2-E1)

During Installation Installed Torsion Resistance (IEC 60794-1-2-E7) Crush Resistance (IEC 60794-1-2-E3) Kink Resistance (IEC 60794-1-2-E10) Water Penetration (IEC 60794-1-2-F5B) 1800 N 1000 N 10 Cycle (± 360°) 5 Kg, weight, L=1 Mtr 1000 N (100 X 100 mm), for 60 sec 10D, D=Cable Diameter 1 Mtr Water Head, 3 Mtr Cable Sample, 24 Hours

Variants*

*Cable can be supplied with single mode (ITU-T-G652, G655, and G657) & Multimode (50µm & 62.5µm) *Outer Jacket can be of PVC, LSZH, and HDPE *Strength member can be Steel or FRP

Fibre Count	Diameter (mm) (Nominal)	Weight (kg/km)	Tensile Strength Installation	Tensile Strength Installed
Upto 12	8.5	70	1800	1000

Applications

Direct Buried / Inside Duct In areas where high mechanical load is required In areas where rodent attack is there

Cable Construction

Up to 144 low water peak single mode fibres in compliance with ITU-T-G.652D

Non metallic and anti buckling element FRP rod used as Central Strength Member

Loose buffer tubes jelly filled

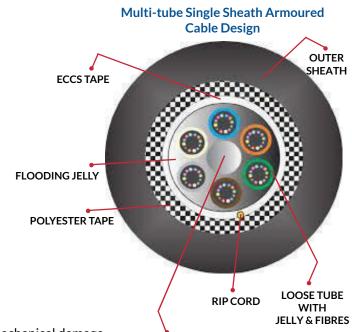

Loose buffer tubes S-Z Stranded

Cable core filled with jelly

S-Z core wrapped with polyester tape

ECCS Tape Armouring (Corrugated)

UV stabilized PE outer sheath, black

Special Features

Corrugated steel tape act as protection against rodents and mechanical damage

Robust construction

CENTRAL STRENGTH MEMBER

Flexible buffer tubes provide easy fibre routing inside closure

Mechanical Characteristics

Temperature Range (IEC 60794-1-2-F1)
Laying & Installation -10°C to +50°C
Operation -20°C to +60°C

Tensile Force (IEC 60794-1-2-E1)

During Installation Installed Torsion Resistance (IEC 60794-1-2-E7) Crush Resistance (IEC 60794-1-2-E3) Kink Resistance (IEC 60794-1-2-E10) Water Penetration (IEC 60794-1-2-F5B)

Cable Bending Radius (IEC 60794-1-2-E11A)

During Installation 20D, D=Cable Diameter Installed 15D, D=Cable Diameter D=Cable Diameter 30 Cycle, r=20D, 5 Kg (IEC 60794-1-2-E6) Load, D=Cable Diameter

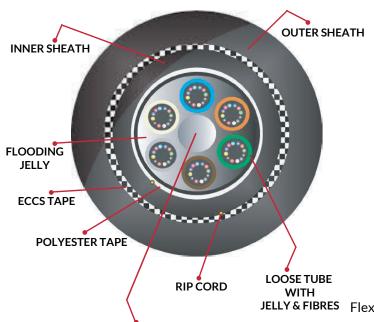

2700 N 1500 N 10 Cycle (± 360°) 5 Kg, weight, L=1 Mtr 1800 N (100 X 100 mm), for 60 sec 10D, D=Cable Diameter 1 Mtr Water Head, 3 Mtr Cable Sample, 24 Hours

- * Cable can be supplied with single mode (ITU-T-G652, G655 and G657) & Multimode (50μm & 62.5μm)
- * Outer Jacket can be of PVC, LSZH, and HDPE
- * Strength member can be Steel or FRP

Fibre Count	Diameter (mm) (Nominal)	Weight (kg/km)	Tensile Strength Installation	Tensile Strength Installed
Up to 72	11.5	125	2700	1500
96	13.5	170	2700	1500
144	16.0	250	2700	1500

Multi-tube Double Sheath Armoured Cable Design

Applications

Direct buried / Inside Duct In areas where high mechanical load is required In areas where rodent attack is there

Cable Construction

Up to 144 low water peak single mode fibres in compliance with ITU-T-G.652D Non metallic and anti buckling element FRP rod used as Central Strength Member Loose buffer tubes jelly filled Loose buffer tubes S-Z Stranded Cable core filled with jelly S-Z core wrapped with polyester tape ECCS Tape Armouring (Corrugated) UV stabilized PE Inner & outer sheath, black

Special Features

Corrugated steel tape act as protection against rodents

LOOSE TUBE
WITH
Robust construction

JELLY & FIBRES
Flexible buffer tubes provide easy fibre routing inside closure

Mechanical Characteristics

Temperature Range (IEC 60794-1-2-F1) Laying & Installation -10° C to $+50^{\circ}$ C Operation -20° C to $+60^{\circ}$ C

Cable Bending Radius (IEC 60794-1-2-E11A)

CENTRAL

STRENGTH MEMBER

During Installation 20D, D=Cable Diameter 15D,D=Cable Diameter Repeated Bending 30 Cycle, r=20D, 5 Kg (IEC 60794-1-2-E6) Load, D=Cable Diameter

Tensile Force (IEC 60794-1-2-E1)

During Installation 3500 N Installed 2000 N

Torsion Resistance (IEC 60794-1-2-E7) 10 Cycle (\pm 360°) 5 Kg, weight, L=1 Mtr Crush Resistance (IEC 60794-1-2-E3) 1800 N (100 X 100 mm), for 60 sec

Kink Resistance (IEC 60794-1-2-E10) 10D, D=Cable Diameter

Water Penetration (IEC 60794-1-2-F5B) 1 Mtr Water Head, 3 Mtr Cable Sample, 24 Hours

Variants*

* Cable can be supplied with single mode (ITU-T-G652, G655 and G657) & Multimode (50μm & 62.5μm)

*Outer Jacket can be of PVC, Nylon, LSZH, and HDPE

^{*}Strength member can be Steel or FRP

Fibre Count	Diameter (mm) (Nominal)	Weight (kg/km)	Tensile Strength Installation	Tensile Strength Installed
Up to 48	14.0	180	2700	1500
96	15.5	220	2700	1500
144	19.0	300	2700	1500

Applications

Self supporting aerial installation with rigorous load conditions Including heavy wind & ice Suitable for span length of 100 mtrs

Cable Construction

Up to 144 low water peak single mode fibres in compliance with ITU-T-G.652D

Non metallic and anti buckling element FRP rod used as Central Strength Member

Loose buffer tubes jelly filled

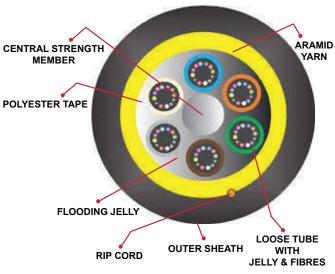

Loose buffer tubes S-Z Stranded

Cable core filled with jelly / WS Yarn

S-Z core wrapped with polyester tape / WS Tape

High modulus, aramid yarns peripheral strength member

UV stabilized outer sheath, black

All Dielectric Self Supporting Cable Multi Loose Tube Design

Mechanical Characteristics

Temperature Range (IEC 60794-1-2-F1)
Laying & Installation -10°C to +50°C
Operation -20°C to +60°C

Cable Bending Radius (IEC 60794-1-2-E11A)

During Installation 20D, D=Cable Diameter 15D, D=Cable Diameter 30 Cycle, r=20D, 5 Kg (IEC 60794-1-2-E6) Load, D=Cable Diameter

Special Features

Single layer stranded construction
Offers exceptional strength and corrosion resistance
for Aerial application
Flexible buffer tubes provide easy fibre routing
inside closure

Tensile Force (IEC 60794-1-2-E1)

During Installation 5W*
Installed 2W*
Torsion Resistance
(IEC 60794-1-2-E7) 10 Co

Crush Resistance (IEC 60794-1-2-E3)

Kink Resistance (IEC 60794-1-2-E10) Water Penetration (IEC 60794-1-2-F5B) 5W * 9.81 N 2W * 9.81 N

10 Cycle (± 360°) 5 Kg, weight, L=1 Mtr

2000 N (100 X 100 mm), for 60 sec

20D, D=Cable Diameter

1 Mtr Water Head, 3 Mtr Cable Sample, 24 Hours

^{*}Cable construction can be jelly filled or dry core

Fibre Count	Diameter (mm) (Nominal)	Weight (kg/km)	Tensile Strength Installation	Tensile Strength Installed
Up to 48	11.0	135	5000	2500
96	12.5	180	5000	2500
144	15.5	250	5000	2500

^{*}Cable can be supplied with single mode (ITU-T-G652, G655 and G657) & Multimode (50µm & 62.5µm)

^{*}Outer Jacket can be of PVC, LSZH, and HDPE

FTTH Cable (2F)

Applications

Low bending cable suitable for Indoor application

Cable Construction

Primary coated fibre – G.657 Strength Member – ARP Rods Sheath – White LSZH Loose buffer tubes S-Z Stranded

Outer Sheath (LSZH) Optical Fibres (G.657)

Variants*

^{*}These are general characteristics; customized designs are available as per requirements

Fibre Count	Diameter (mm) (Nominal)	Weight (kg/km)	Tensile Strength Installation	Tensile Strength Installed
1 to 2F	3.2 x 2.1	20	150	100

Suitable for Outdoor Application

Drop Cable (2 to 6F)

Applications

Drop cable suitable for outdoor application Suitable for introducing fibre into the building

Cable Design

2, 4, 6 No of Single Mode Fibre – G.652D Strength Member – ARP Rods UV Stabilized HDPE Sheath, black Supporting FRP Rod / Steel WIre

Mechanical Characteristics

Temperature Range (IEC 60794-1-2-F1)

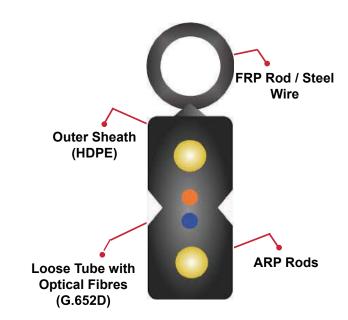

Laying & Installation $-10^{\circ}\text{C to } +50^{\circ}\text{C}$ Operation $-20^{\circ}\text{C to } +60^{\circ}\text{C}$

Cable Bending Radius (IEC 60794-1-2-E11A)

During Installation 20D, D=Cable Diameter 15D, D=Cable Diameter

Tensile Force (IEC 60794-1-2-E1)

Installed 500 N During Installation 1000 N

Fibre Count	Diameter (mm) (Nominal)	Weight (kg/km)	Tensile Strength Installation	Tensile Strength Installed
2 to 6F	6.8 x 3.0	20	1000	500

^{**}Strength member can be Steel or FRP

Outdoor Fibre Optic Cable (2-8 F)

Applications

Indoor or Outdoor Military or civil applications Rapid Deployment in harsh conditions

Special Features

Lighter weight cable for fast and easy installation Robust Construction Rodent Proof High crush resistance

Mechanical Characteristics

Tensile Force

During Installation 1800 N Installed 1100 N

Crush Resistance 1000 N (100 X 100 mm)

Cable Construction

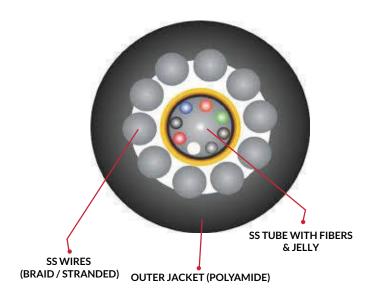

Up to 8 fibres, Single Mode or Multimode fibres Gel-filled stainless steel loose tube, centrally placed in the cable Armouring & strain relief made of stainless steel wires Outer Sheath is of Polyamide with extra abrasion resistnce

Temperature Range

Laying & Installation -50°C to +70°C Operation -40°C to +60°C

Min Bending Radius

Permanent 10*D, D=Cable Diameter Installed 15*D, D=Cable Diameter

Stainless Steel Loose Tube with Stainless Steel Wire Armouring Cable

Variants*

*Cable can be supplied with single mode (ITU-T-G652, G655 and G657) & Multimode (50μm & 62.5μm) *Outer Jacket can be of PVC, Nylon, PU, LSZH, and HDPE

Fibre Count	Diameter (mm) (Nominal)	Weight (kg/km)	Tensile Strength Installation	Tensile Strength Installed
Upto 8	4.0	28	1000	800

Tactical Cable (2-12 F)

Applications

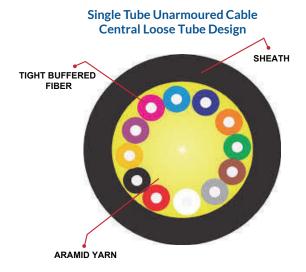

Suitable for Aerial, Pipeline Intra Building Backbones & Installation inharsh environment for Distribution

Mechanical Characteristics

Temperature Range (IEC 60794-1-2-F1)
Laying & Installation -10°C to +50°C
Operation -20°C to +60°C

Tensile Force (IEC 60794-1-2-E1)

During Installation 1000 N Installed 800 N

Cable Construction

Tight Buffered Fiber without jelly compound

Special Features

Light weight cable for fast and easy installation

Cable Bending Radius (IEC 60794-1-2-E11A)

During Installation 25D, D=Cable Diameter 20D, D=Cable Diameter

Crush Resistance 1000 N

Drum Length

2000 / 3000 / 4000 meters ± 10%

Cable Drum Packing

Every lenght will be delivered on non-returnable wodden drums. Generally the cable drum flange will be marked with following.

Arrow showing rolling direction of drum.

Manufacturer's name

Number of fibers

Cable lenght in meters

Drum Number

Net & gross weight

Customer's name & destination

Both ends of the cable shall be sealed to prevent the ingress of moisture during transportation & storage, physical damage

Cable Sheath Marking

Cable sheath shall be marked in white color with hot indentation method. Marking details can be customized. Below mentioned details are generally marked on the cable sheath. Drum Number, Telephone Symbol, Laser Symbol, Number of Fibers, Month & Year of Manufacturing, Manafacturer's Name Sequential Length Marking

- *Cable can be supplied with single mode (ITU-T-G652, G655 and G657) & Multimode (50μm & 62.5μm)
- *Outer Jacket can be of PVC, NYLON, LSZH, HDPE and PU
- *Cable construction can be jelly filled or dry core
- *Strength member can be Steel or FRP

5th Pair	White & Slate	1

General Instructions

Drum Length

 $3000 \text{ meters} \pm 5\%$

Cable Sheath Marking

Cable sheath shall be marked in black colour with hot foil indentation / inkjet printing. Marking details can be customized. Below mentioned details are generally marked on the cable sheath.

Drum Number, Telephone Symbol, Laser Symbol, Number of Fibres, Cable Type, Manufacturer's Name, Year, Sequential Length Marking.

Cable Drum Packing

Every length will be delivered on non-returnable wooden drums. Generally the cable drum flange will be marked with following.

- Arrow showing rolling direction of the drum.
- Manufacturer's name
- Number of fibres
- Cable length in meters
- Drum Number
- Net & Gross weight
- Customer's name & destination

Both ends of the cable shall be sealed to prevent the ingress of moisture during transportation and storage, physical damage.
